Wentworth Appoints New Managing Director
for Amtec GmbH

May 13, 2005, Burlington, Ontario, Canada

I am pleased to announce the appointment of Mr. Bernd Haefke to the position of Managing Director of Amtec GmbH, Wentworth Technologies' high precision mould manufacturing company. Mr. Haefke led the sales and technology division of a high precision moulding equipment program, and brings to Amtec his strong general management and business development experience in high technology industrial businesses. His experience in international markets will enable Bernd to provide leadership to Amtec's international business development.

Mr. Haefke will join Amtec on June 1, 2005 and be located at Amtec's head office in Hohenwestedt, Germany.

Amtec GmbH is a member of the Wentworth Technologies group of companies. It is the high technology, high precision moulds manufacturer, and a member of the injection mould tooling group of Wentworth. Medical devices, precision consumer products, electronic products and automotive high precision small parts are the specialties of Amtec. Amtec is a Best Value Supplier in its segment with a manufacturing operation equipped with the latest in high speed, high precision equipment. It also benefits from access to low cost components available from Wentworth's operations in Poland.

Amtec has recently also taken the initiative of establishing a North American presence in Toronto, Canada where a sales and program management function is being established.

Mr. Haefke may be contacted through the head office of Amtec GmbH from June 1, 2005 and the contact information is as follows:

Amtec GmbH
